

# KOA-550

## 5 POCKET BANKNOTE SORTING SYSTEM

The KOA-550 is an intelligent and reliable currency sorting system. Using pattern recognition, and a series of high resolution image sensors to determine various banknotes, the KOA-550 makes light work of counting, sorting, facing, windowing and batching large amounts of mixed banknotes. The KOA-550 does not use costly gate motors, and because sorting times are reduced there is much less wear & tear on moving parts.

### **VALUE COUNT/IDENTIFY MIXED NOTES AT HIGH SPEED**

Using 5 pockets the KOA-550 will value count into the bottom pocket until it fills, and then move upward filling each pocket until all 4 pockets have been used, thus minimizing handling

### **SORTING OF DENOMINATIONS**

Using all 5 pockets (at 600 notes per minute) the KOA-550 is able to sort all Australian banknote denominations at once by sending each of them to their relevant pocket

### **FACE/WINDOW NOTES IN ONE SIMPLE STEP**

Using 4 pockets the KOA-550 will face and window each denomination in one pass.

### **BATCHING**

The KOA-550 will count & batch the required number of notes into each of the top 4 pockets. Simply take the batch out of any pocket and the KOA-550 will quickly refill that pocket

### **EASY OPERATION**

With a large graphic LCD and user-friendly interface

### **SIMPLE MAINTENANCE**

Modular design allows the operator to easily remove jammed notes, and because the KOA-550 is on a turntable it can easily be rotated for access to the rear

### **HIGH PERFORMANCE & COST EFFECTIVE**

Offering the best price to performance ratio in Australia the KOA-550 is the most compact design of any 5-pocket machine

### **UPGRADE OPTIONS**

Fitness Sorting  
PC and printer connectivity  
External Display

### **DIMENSIONS**

(W) 390mm x (D) 320mm x (H) 580mm

### **WEIGHT**

30kgs

*\*THIS MACHINE IS AN IDEAL UPGRADE FOR THE 2800 AND 2890\**
