

CD-211 Coin Deposit Machine (non-sorting)

The CD-211 is an intelligent, and integrated coin deposit system. The compact design takes up a small footprint making it a desirable option for banking and retail businesses. Customer's simply pour coins into the top hopper and the CD-211 will count, deposit, and print the customer a receipt. The data can then be transferred to the back of house system. This makes it a huge time saving solution for businesses.

FEATURES

- High Speed – 700 coins per minute.
- User friendly 7-inch TFT display.
- Built in printer with wide paper for easy replacement.
