

## GL-7 Banknote/TITO Clearance System

The GL-7 is a high-performance banknote and TITO sorting machine with 6 counting pockets plus 1 reject pocket. The GL series features cutting-edge detection technology to improve processing speed and accuracy. By utilizing barcode imaging and archiving, both sides of the tickets are captured, recorded, and easily exported to PC for compact storage.

The 10-inch LCD touch screen enhances the user experience. Extendable configuration based on the main cash sorting unit facilitates various cash processing scenarios in high-volume clubs, CIT businesses, and the back office of bank branches.

### FEATURES

- High Speed - 1,200 banknotes per minute
- Upload all expected cash/ticket amounts in seconds prior to starting the clearance (optional)
- Automatically verify each expected amount against the actual amount as you go (optional)
- Count and sort cash/tickets in one pass
- Automatic imaging of tickets for archiving
- 500 stacker pocket capacity
- Available with 4 - 13 pockets (optional)

This system will also scan all of your TITO tickets and verify them against the expected tickets uploaded from your gaming system for that clearance. It will save the clearance file (cash and tickets) to export into your gaming system, plus all the barcode images into a separate file.

This can then be saved onto your network or a portable hard drive etc. If you ever need to find a ticket you search for the barcode number and the image is instantly displayed on your PC screen.

## OPTIONAL CLEARANCE SOFTWARE

By utilising clearance software with the counting machine, it will enable the operator to export directly into your poker machine analysis/compliance program thus eliminating manual data entry.

The software will simply take readings from the machine as you run each poker machine through, and then give

you the ability to both print and export.

**This will also allow you to image your TITO tickets to digitally save them on PC.**

You will also have ongoing records of all past clearances including operator names.

The screenshot displays the Abacus Clearance Software interface. On the left, a table shows the 'Machine Breakdown' with columns for Machine No., Amount, Expected, Variance, and Tickets. The total amount is \$990.00. On the right, a 'Total Clearance Breakdown' table shows denominations and their counts, totaling \$8,210.00 and 232 tickets. A barcode for 'Tickets 23' is also visible. To the right of the software window, a scanned TITO ticket is shown with the text 'CASH AMOUNT \$420.99' and a barcode.
